

Toolingu.com Selects BlueBridge Networks as their Primary Data Center

BlueBridge Networks provides high availability, reliability and security solutions for data center and managed services

CLEVELAND -- March 8, 2010 -- BlueBridge Networks LLC, a premier data center collocation and managed services provider, announced today that Toolingu.com selected the organization to house their mission-critical data within the company's Cleveland-based enterprise-class data center. As part of the selection, Toolingu.com has signed a multi-year contract with BlueBridge Networks to include data center services, managed storage and managed security services.

A leading provider of online training for the manufacturing industry, Toolingu.com offers training packages for machinists, maintenance professionals, welders and assemblers, as well as custom-created training materials for a variety of organizations, ranging from small companies to Fortune 500 manufacturers.

"Toolingu.com had outgrown our current data center and we were seeking a company who could provide robust solutions that were reliable, scalable and secure," said Chad Schron, Vice President of Toolingu.com. "Finding a company capable of managing and accommodating our business growth was imperative. Our selection of BlueBridge Networks is not only a result of their close proximity to our corporate headquarters, but primarily due to the tremendous service offerings and overwhelmingly positive reputation for having a strong commitment to customer service and the Cleveland community. We required a partner who was able to assist us with our data migration plan, and BlueBridge Networks' highly-skilled team worked well with our engineers throughout the entire staging, testing, security and audit process. The implementation process went extremely smooth and we are very pleased with our selection in BlueBridge Networks."

"BlueBridge Networks is committed to providing our customers with technology solutions aimed at solving today's most complex IT business challenges," said Jeff Levine, President of BlueBridge Networks. "By selecting BlueBridge Networks to host their data assets, Toolingu.com will benefit by realizing minimized downtime, reduced costs and ensured business continuity. Toolingu.com and its customers can rely on BlueBridge Networks to provide high availability and uptime of their systems, with 24/7 support and superior security – allowing them the necessary time to focus on their daily business and operations," said Jeff Levine.

BlueBridge Networks is committed to providing enterprise-class responsiveness and unparalleled, 24x7x365 professional services. Our specialty is customizing our level of support to your organizations' unique needs. Our customers and community are our top priorities, and BlueBridge employees support Northeast Ohio community projects throughout the year. BlueBridge Networks offers an array of state-of-the-art services, including managed security, managed storage, disaster recovery, business continuity and virtualization, providing a complete solution to our customers.
