SOFTWARE

Hyland chooses BlueBridge backup

Westlake's Hyland Software Inc. is the latest local technology outfit to team up with Cleveland's BlueBridge Networks LLC, a data protection and disaster recovery firm that leases space at its Euclid Avenue office to IT servers. Hyland will use BlueBridge's data center to back up the hosted version of its OnBase OnLine software program. Other BlueBridge clients include Case Western Reserve University and IT firms Brulant Inc. and Mirifex Systems LLC.
